Boise, Idaho

We have audited the accompanying consolidated financial statements of St. Luke's Health System, Ltd. and its subsidiaries (the "Health System"), which comprise the consolidated balance sheets as of September 30, 2018 and 2017, and the related consolidated statements of operations and changes in net assets, and of cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Health System's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Health System's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of St. Luke's Health System, Ltd. and its subsidiaries as of September 30, 2018 and 2017, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Disclaimer of Opinion on Charity Care Schedule

The charity care schedule summarized in Note 1, which is the responsibility of the Health System's management, is not a required part of the basic financial statements, and we did not audit or apply limited procedures to such information and we do not express any assurances on such information.

St. Luke's Health System, Ltd. and subsidiaries

Notes to the Consolidated Financial Statements As of and for the Years Ended September 30, 2018 and 2017 (In thousands)

1. Summary of Significant Accounting Policies

Organization—St. Luke's Health System, Ltd. and subsidiaries (the "Health System") is an Idaho-based not-for-profit organization providing comprehensive integrated healthcare services throughout the communities it serves.

The Health System provides patient services, including outpatient and inpatient, rehabilitation services and physician services. The Health System's primary hospitals and patient service areas are located within the State of Idaho in or surrounding the cities of Boise, Meridian, Nampa, Twin Falls, Mountain Home, McCall, Jerome, and Ketchum and have other facilities and operations throughout Southern Idaho and Eastern Oregon.

The Health System's wholly owned subsidiary, St. Luke's Health Partners, is a financially and clinically-integrated network that allows independent physicians and facilities to partner with the Health System. St. Luke's Health Partners is organized to assume financial and clinical accountability in capitated arrangements. These arrangements include governmental and commercial payers, as well as self-funded employers. Under these arrangements, St. Luke's Health Partners is accountable for the management of health outcomes and medical spend for defined populations through value-based agreements with payers.

The Health System's general offices and corporate functions are located in Boise, Idaho. The Health System is governed by volunteer boards made up of local citizens.

Basis of Presentation—The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. Intercompany transactions have been eliminated. As of and for the years ended September 30, 2018 and 2017, certain line items within the consolidated financial statements have been either expanded or condensed for presentation purposes only. These changes were made consistently for both current and prior-year balances, thus maintaining comparative financial presentation.

Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates, assumptions and judgments that affect the amounts reported in the consolidated financial statements. The Health System considers critical accounting estimates to be those that require more significant judgments and estimates in the preparation of its consolidated financial statements, including the following: contractual allowances for uncollectible accounts receivable, provisions for bad debt and charity care; useful lives of depreciable assets; liabilities associated with employee benefit programs; self-insured professional liability risks not covered by insurance; medical claims incurred but not yet reported; and potential settlements with the Medicare and Medicaid programs.

Changes in estimates are included in results of operations in the period when such amounts are determined and actual amounts could differ from such estimates.

Statements of Operations—Transactions deemed by management to be ongoing, major, or central to the provision of integrated health care services are reported as unrestricted revenues, gains and other support and expenses.

Discontinued Operations—The Health System reports financial results for discontinued operations separately from continuing operations to distinguish the financial impact of disposal transactions from ongoing operations. During the year ended September 30, 2017 the Health System completed the sales transaction of a certain medical practice. Accordingly, the assets and liabilities, operating results and operating and investing cash flows for the medical practice are presented as discontinued operations separate from the Health System’s continuing operations and the results for all periods presented in these consolidated financial statements and the notes to the consolidated financial statements, unless otherwise noted. Refer to Note 2 for further information regarding the Health System’s discontinued operations.

Temporarily and Permanently Restricted Net Assets—Temporarily restricted net assets are those whose use by the Health System is limited by donor-imposed stipulations that either expire by passage of time or can be fulfilled and removed by actions of the Health System pursuant to those stipulations. Permanently restricted net assets are assets whose use by the Health System is limited by donor-imposed stipulations that neither expire by passage of time nor can be fulfilled or otherwise removed.

Donor Restricted Gifts—Unconditional promises to give cash, pledges receivable and other assets are recorded at fair value at the date the promise is received. Conditional promises to give and indications of intentions to give are reported at fair value at the date the gift is received. The gifts are reported as either temporarily or permanently restricted support if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statement of operations and changes in net assets as net assets released from restrictions. Total pledges receivable, net of allowances, as of September 30 are as follows:

	2018	2017
Less than one year	\$ 2,340	\$ 2,348
One to five years	1,498	1,114
More than five years	<u> -</u>	<u> 5</u>
	3,838	3,467
Less allowance for estimated uncollectible accounts	<u> 85</u>	<u> 70</u>
Total pledges receivable	<u><u>\$ 3,753</u></u>	<u><u>\$ 3,397</u></u>

Cash and Cash Equivalents—Cash and cash equivalents represents cash on hand and cash in banks, excluding amounts whose use is limited, and consists primarily of cash and highly liquid investments with original maturities of three months or less. As of September 30, 2018 and 2017, the Health System had book overdrafts of \$7,147 and \$6,824, respectively, that is included in accounts payable and accrued liabilities.

Inventories—Inventories consist primarily of medical and surgical supplies and are stated at the lower of cost (on a moving-average basis) or net realizable value.

Assets Whose Use is Limited—Assets whose use is limited include assets set aside by the Board of Directors for future capital purposes over which the Board retains control and may, at its discretion, subsequently be used for debt retirement or other purposes. It also includes assets held by trustee under indenture agreements, assets restricted by donors for specific purposes and permanent endowment funds.

The Health System's long-term and short term investment portfolios are managed according to investment policies adopted by the Health System and based on overall investment objectives. Board designated funds are investments established by the Board for strategic future capital or operating expenditures intended to expand or preserve services provided to the communities it serves. All investments are classified as available for sale and recorded at fair value using settlement date accounting. Realized gains (losses) on investments whose use has not been restricted by the donor, including unrestricted income from endowment funds, are reported as part of investment income. Investment income and gains (losses) on investments whose income has been restricted by the donor are recorded as increases (decreases) to temporarily or permanently restricted net assets.

The Health System's investments primarily include mutual funds and debt securities that are carried at fair value. The Health System evaluates whether securities are other-than-temporarily impaired (OTTI) based on criteria that include the extent to which cost exceeds market value, the intent to sell, the duration of the market decline, the credit rating of the issuer or security, the failure of the issuer to make scheduled principal or interest payments and the financial health and prospects of the issuer or security. Any declines in the value of investment securities determined to be OTTI are recognized in earnings and reported as OTTI losses. The Health System determined that no securities were OTTI as of September 30, 2018 and 2017.

Equity Method Investment—The Health System owns a membership interest of 49.5% in Broadway Park Holdings, LLC. The Health System accounts for its investment in this entity using the equity method and records the investment at cost. The Health System's investment in this entity was \$11,554 as of September 30, 2018. The Health System's investment in the entity is increased by additional contributions to the entity as well as its proportionate share of earnings in the entity. Conversely, the Health System's investment is decreased by distributions made to the Health System and by its proportionate share of losses. During the year ended September 30, 2018, the Health System recognized equity earnings from the investment in this entity of \$438.

Property, Plant, and Equipment—Property, plant, and equipment, including internal use software, are recorded at cost with the exception of donated assets, which are recorded at fair value at the date of donation. Property and equipment donated for Health System operations are recorded as additions to property, plant, and equipment when the assets are placed in service. Depreciation is computed using the straight-line method over the estimated useful lives of the depreciable assets with depreciation taken in both the year placed in service and the year of disposition.

The estimated useful lives of each asset ranges are as follows:

Buildings	15–40 years
Fixed and major movable equipment	2–20 years
Leasehold improvements	5–15 years
Information technology	3–7 years

Expenditures for maintenance and repairs are charged to expense as incurred and expenditures for renewals and betterments are capitalized. Upon sale or retirement of depreciable assets, the related cost and accumulated depreciation are removed from the records and any gain or loss is reflected in the statement of operations. Periodically, the Health System evaluates the carrying value of property, plant, and equipment for impairment based on undiscounted operating cash flows whenever events or changes occur which might impact recovery of recorded assets.

Other Assets—Other assets includes land and buildings held for future investment or future expansion, goodwill and other non-limited use assets.

Goodwill—Goodwill represents the future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognized. Goodwill is not amortized but is subject to annual impairment testing at the reporting unit level. A reporting unit is defined as a component of an organization that engages in business activities from which it may earn revenues and incur expenses, whose operating results are regularly reviewed for decision making purposes and for which discrete financial information is available.

The quantitative impairment testing for goodwill includes a process consisting of identifying a potential impairment loss by comparing the fair value of the reporting unit to its carrying amount, including goodwill, and then measuring the impairment loss by comparing the implied fair value of the reporting unit to its carrying value. The fair value is estimated based upon internal evaluations of the related long-lived assets for each reporting unit and can include comparable market prices, quantitative analyses of revenues and estimated future net cash flows. If the fair value of the reporting unit assets is less than their carrying value including goodwill, an impairment loss is recognized.

Our annual impairment test was performed as of June 30, 2018. In addition, impairment reviews are performed whenever circumstances indicate a possible impairment may exist.

Costs of Borrowing—Interest cost incurred on borrowed funds during the period of construction of capital assets is capitalized as a component of the cost of acquiring those assets. Financing costs are deferred and amortized over the life of the debt.

Net Patient Service Revenue—Net patient service revenue before provision for bad debts is reported at the estimated net realizable amounts from patients, third-party payors, and others, including estimated adjustments under reimbursement agreements with third-party payors when services are rendered. As final settlements are made and estimates are revised, the differences are reflected in current operations.

Charity Care—The Health System provides services to all patients regardless of their ability to pay in accordance with its charity care policy. The estimated cost of providing these services was \$45,135 and \$44,030 in 2018 and 2017, respectively, calculated by multiplying the ratio of cost to gross charges for the Health System by the gross compensated charges associated with providing care to charity patients.

In addition to charity care services, the Health System provides services to patients who are deemed indigent under state Medicaid and county indigency program guidelines. In most cases, the cost of services provided to these patients exceeds the amounts received as compensation from the respective programs. In addition, in response to broader community needs, the Health System also provides many programs such as health screening, patient and health education programs, clinical and biomedical services to outlying hospitals, and serves as a clinical teaching site for higher education programs of health professionals. The following unaudited schedule summarizes the charges forgone in accordance with the Health System’s charity care policy, the unpaid costs associated with services provided under Medicare, Medicaid, and county indigency programs, and the benefit of services provided to support broader community needs:

	Unaudited	
	2018	2017
Estimated unpaid costs of services provided under Medicare, Medicaid, and county indigency programs	\$ 325,395	\$ 330,980
Estimated benefit of services to support broader community needs	52,709	51,742

Income Taxes—The Health System is a not-for-profit corporation and is recognized as tax-exempt pursuant to Section 501(c)(3) of the Internal Revenue Code of 1986, as amended. The Health System accounts for uncertain tax positions in accordance with ASC Topic 740. Income tax liabilities are recorded for the expected impact of positions taken on income tax returns. Management is not aware of any uncertain tax positions that should be recorded.

Unrelated Business Income—The Health System is subject to federal excise tax on its unrelated business taxable income (UBTI). As of September 30, 2018, the Health System had approximately \$8,701 of UBTI net operating losses from operating losses incurred from 1999 to 2018, which expire in years 2019 to 2039. The Health System does not believe that it is more likely than not they will utilize these losses prior to their expiration and as such has provided a full valuation allowance against these losses.

Capitated Revenue—Capitated revenue represents contractual revenue from value-based arrangements at St. Luke’s Health Partners, where financial responsibility is assumed for services provided to enrollees by other institutional health care providers. In these arrangements, a settlement amount is calculated based on medical claims experience as compared to budget targets based on contractual terms. Capitated revenue is recognized during the period for which institutional providers are obligated to provide health services to enrollees. Settlements are accrued during the period in which the related services are rendered. Losses expected under the contract period in value-based arrangements are recognized when it is probable that expected medical claim expense exceeds future capitated revenue.

Reserves for incurred but not reported medical claims have been established for the unpaid costs of health care services covered under the value-based arrangements. The reserves are estimated based on actuarial analysis, historical experience, and payment trends. Subsequent actual claims experience will differ from the estimated reserve due to variances in estimated and actual utilization of health care services. As final settlements are made and estimates are revised, the differences are reflected in current operations.

St. Luke's Health Partners bears full performance exposure on all significant value-based arrangements, with the exception of the Next Generation ACO program which is capped at plus or minus 10% of the capitated funding. St. Luke's Health Partners purchased provider excess loss coverage for this program. All other value-based arrangements include reinsurance purchased by the sponsoring payer, and is netted within medical claims expense related to the arrangement.

Adopted Accounting Pronouncements—On October 1, 2017, the Health System early adopted ASU No. 2017-07, *“Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost.”* This guidance requires entities to present the newly defined service costs within income from operations, and all other net periodic benefit costs as a change in unrestricted net assets. The adoption of this guidance requires retrospective presentation, which resulted in a decrease in employee compensation and benefits and a corresponding increase in other components of net periodic pension cost on the Consolidated Statements of Operations and Changes in Net Assets for the years ended September 30, 2018 and 2017 in the amounts of \$4,014 and \$7,226, respectively. For comparability, the changes for both years were also reflected in the Consolidated Statement of Cash Flows.

On October 1, 2017, the Health System adopted ASU No. 2017-02, *“Not-for-profit Entities-Consolidations.”* This guidance clarifies when a not-for-profit entity that is a general partner or a limited partner should consolidate a for-profit limited partnership or similar entity. This guidance amends ASU No. 2015-02, *“Consolidation (Topic 810).”* Adoption of this amended guidance did not impact the consolidated financial statements.

Forthcoming Accounting Pronouncements—In January 2016, Financial Accounting Standards Board (“FASB”) issued ASU No. 2016-01, *“Recognition and Measurement of Financial Assets and Financial Liabilities,”* as well as amended technical guidance through ASU No. 2018-03, *“Technical Corrections and improvements of financial Instruments-Overall (Subtopic 825-10).”* These updates revise accounting related to (1) the classification and measurement of investments in equity securities and (2) the presentation and certain fair value changes for financial liabilities measured at fair value. They also amend certain disclosure requirements associated with the fair value of financial instruments. This guidance is effective for the Health System beginning October 1, 2019. The Health System is still evaluating the impact this guidance may have on its consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, *“Leases.”* This guidance introduces a lessee model that brings substantially all leases onto the consolidated balance sheet. In July 2018, FASB issued ASU No. 2018-10 *“Codification Improvements to Topic 842, “Leases”.* This guidance effects narrow aspects of the guidance issued in ASU No. 2016-02. In July 2018, FASB issued ASU No. 2018-11 *“Leases (Topic 842).”* This guidance provides targeted improvements to the guidance issued in ASU No. 2016-02. This guidance provides entities with an additional (and optional) transition method to adopt the new lease standard. The guidance will be effective for the Health System beginning October 1, 2019. The Health System is still evaluating the impact this guidance may have on its consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-07, *“Investments—Equity Method and Joint Ventures: Simplifying the Transition to the Equity Method of Accounting.”* This guidance eliminates the requirement to retrospectively apply the equity method to an investment that subsequently qualifies for such accounting as a result of an increase in the level of ownership interest or degree of influence. This guidance is effective for the Health System beginning October 1, 2018. The Health System does not expect this guidance to have a material impact on the consolidated financial statements.

In May 2016, FASB issued ASU No. 2016-12, *“Revenue From Contracts with Customers: Narrow-Scope Improvements and Practical Expedients,”* which amends certain aspects of the FASB’s revenue standard ASU 2014-09, *“Revenue From Contracts with Customers.”* In March 2016, the FASB issued ASU No. 2016-08, *“Revenue From Contracts with Customers: Principal Versus Agent Considerations (Reporting Revenue Gross Versus Net).”* This guidance amends the principal versus agent implementation guidance and illustrations in the FASB’s revenue standard, ASU No. 2014-09. In July 2015, the FASB issued ASU No. 2015-14, *“Revenue From Contracts with Customers (Topic 606): Deferral of the Effective Date,”* which defers the effective date of the FASB’s revenue standard, ASU 2014-09, by one year for all entities and permits early adoption on a limited basis. In May 2014, the FASB issued ASU No. 2014-09. This guidance outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. After the deferral of the effective date, this guidance is effective for the Health System for fiscal year 2019. The Health System established a cross-functional implementation team consisting of representatives from various departments. Extensive analysis has been completed as to the impact of the standard on our various revenue streams, including the review of current contracts, accounting policies, and business practices to identify potential differences that would result from applying the requirements of the new standard. The Health System is in the process of making appropriate changes to business processes and controls to support recognition and disclosure under the new standard. The Health System is substantially complete with the analysis, but is still evaluating the impact this guidance will have on the consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-14, *“Presentation of Financial Statements of Not-For-Profit Entities.”* This guidance simplifies and improves how not-for-profit entities classify net assets as well as the information presented in the financial statements and notes about liquidity, financial performance and cash flows. This guidance is effective for the Health System beginning October 1, 2018. The Health System is still evaluating the impact this guidance may have on its consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, *“Classification of Certain Cash Receipts and Cash Payments.”* This guidance adds or clarifies guidance on the classification of certain cash receipts and payments in the consolidated statements of cash flows. This guidance is effective for the Health System beginning October 1, 2019. The Health System is still evaluating the impact this guidance may have on its consolidated financial statements.

In November 2016, the FASB issued ASU No. 2016-18 *“Restricted Cash”* which adds and clarifies guidance in the presentation of changes in restricted cash on the statement of cash flows requiring restricted cash to be included with cash and cash equivalents in the statement of cash flows. This guidance does not provide a definition of restricted cash. This guidance is effective for the Health System beginning October 1, 2019. The Health System is still evaluating the impact this guidance may have on the consolidated statements of cash flows.

In June 2018, the FASB issued ASU No. 2018-08 *“Not-for-Profit Entities (Topic 958).”* This guidance provides clarification for not-for-profit entities on the accounting for contributions received and contributions made. Specifically, providing guidance on evaluating contributions versus exchange transactions and determining whether a contribution is conditional. This guidance is effective for the Health System beginning October 1, 2018. The Health System is still evaluating the impact this guidance may have on its consolidated financial statements.

In August 2018, FASB issued No. 2018-13 *“Fair Value Measurement (Topic 820).”* This guidance provides changes to the disclosure requirements for fair value measurements in *“Topic 820, Fair Value Measurement”* to improve the effectiveness of the disclosures. This guidance will be effective for the Health System beginning October 1, 2020. The Health System is still evaluating the impact this guidance may have on its consolidated financial statements.

In August 2018, FASB issued No. 2018-14 *“Compensation—Retirement Benefits—Defined Benefit Plans—General (Subtopic 715-20).”* This guidance modifies the disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans. This guidance will be effective for the Health System beginning October 1, 2021, and allows for early adoption. The Health System is still evaluating the impact this guidance may have on its consolidated financial statements.

In August 2018, FASB issued No. 2018-15 *“Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40).”* The amendments in this update provide guidance to help evaluate the accounting for fees paid in a cloud computing arrangement. This guidance will be effective for the Health System beginning October 1, 2020, and allows for early adoption. The Health System is still evaluating the impact this guidance may have on its consolidated financial statements.

2. Discontinued Operations

Discontinued Operations—On November 12, 2012, private plaintiffs filed a complaint against the Health System in Idaho Federal District Court (the “Court”) asserting that a planned business transaction between the Health System and an independent medical practice violated state and federal antitrust law. The suit sought money damages, attorney fees, and a preliminary and permanent injunction against the transaction. The court denied the request for a preliminary injunction, allowing the transaction to close in December of 2012, but set a trial on plaintiffs’ request for an order unwinding the transaction. On March 26, 2013, the Federal Trade Commission and the State of Idaho filed a complaint for a permanent injunction requiring the Health System to unwind the transaction and pay for attorney fees incurred by the Office of the Idaho Attorney General.

On February 28, 2014, the Court entered a judgment permanently enjoining the transaction and ordering the Health System to unwind the transaction.

On December 10, 2015, the Court entered an order setting out the process to divest the medical practice from the Health System and appointing a Monitor and a Trustee to oversee the process. Based on the nature of the ruling associated with this medical practice, and due to the fact that the divestiture was completed in 2017, the Health System has determined to treat the operations related to the medical practice as discontinued operations in the financial statements.

On May 1, 2017, in accordance with the Court order the Health System completed the sales transaction to divest of the named medical practice. Operations and assets of the medical practice were transferred to the new ownership and all contingencies directly related to the sale were settled as of September 30, 2017. As of September 30, 2018, all judgements, fees and insurance settlements relating to this matter have been monetarily resolved.

The major components of discontinued operations presented in the Consolidated Statement of Operations and Changes in Net Assets include the following:

	2017
Net patient service revenue (net of contractual allowances and discounts)	\$ 13,336
Less provision for bad debts	<u>(23)</u>
Net patient service revenue	13,359
Other revenue	<u>49</u>
Total unrestricted revenues, gains, and other support	13,408
Operating expenses	<u>15,904</u>
Net loss from discontinued operations	(2,496)
Net loss from divestiture	<u>(11,438)</u>
Total net loss	<u>\$ (13,934)</u>

There were no assets and liabilities held for sale presented in the Consolidated Balance Sheets as of September 30, 2018 and 2017.

3. Net Patient Service Revenue

The Health System has agreements with third-party payors that provide for payments to the Health System at amounts different from its established rates. A summary of the payment arrangements with major third-party payors follows:

Medicare—Inpatient acute and certain outpatient care services rendered to Medicare program beneficiaries are paid at prospectively determined rates based upon the service provided. These rates vary according to a patient classification system that is based on clinical, diagnostic, and other factors. Inpatient nonacute services, certain other outpatient services, and defined capital and medical education costs related to Medicare beneficiaries are paid based on a cost reimbursement methodology.

The Health System is reimbursed for cost reimbursable items at a tentative rate with final settlement determined after submission of annual cost reports by the Health System and audits thereof by the Medicare Administrative Contractor (MAC). The Health System's classification of patients under the Medicare program and the appropriateness of their admission are subject to review by a peer review organization under contract with the MAC.

Centers for Medicare and Medicaid Services (CMS) has implemented a number of programs and requirements intended to transform Medicare from a passive payor to an active purchaser of quality goods and services. Hospitals that do not successfully participate in the Hospital Inpatient Quality Reporting Program are subject to an additional .25% reduction in fees. In addition, hospitals that do not demonstrate meaningful use of electronic health records (EHRs) are subject to an additional .75% reduction in fees.

Medicare Access and CHIP Reauthorization Act of 2015 (MACRA), requires the establishment of the Quality Payment Program (QPP), a payment methodology intended to reward high quality patient care. Beginning in 2017, physicians and certain other health care clinicians are required to participate in one of two QPP tracks. Under both tracks performance data in 2017 and 2018 will affect Medicare payments in 2019 and 2020, respectively.

Medicaid—Inpatient and outpatient services rendered to Medicaid program beneficiaries are reimbursed under a cost reimbursement methodology. The Health System is reimbursed at a tentative rate with final settlement determined after submission of annual cost reports by the Health System and audits thereof by the Medicaid fiscal intermediary.

Changes in estimates are included in results of operations in the period when such amounts are determined. The Health System has an opportunity to amend previously settled cost reports. With regard to the amended cost reports, the Health System accrues settlements when amounts are probable and estimable.

Changes in prior year estimates for Medicare and Medicaid increased net patient service revenue by \$38,292 and \$10,708 for the years ended September 30, 2018 and 2017.

Other—The Health System has also entered into payment agreements with certain commercial insurance carriers, health maintenance organizations, and preferred provider organizations. The basis for payment to the Health System under these agreements includes prospectively determined rates per patient day, per discharge and discounts from established charges.

The System records a provision for bad debts related to uninsured accounts to record the net self-pay accounts receivable at the estimated amounts the Health System expects to collect.

Patient service revenue (including patient co-pays and deductibles), net of contractual allowances and discounts (but before provision for uncollectible accounts) by primary payor source, for the year ended September 30 are as follows:

	2018	2017

	<u>\$ 1,734,015</u>	<u>\$ 1,666,643</u>

4. Accounts Receivable and Concentration of Credit Risk

The Health System grants credit without collateral to its patients, most of whom are local residents and many of whom are insured under third-party payor agreements. Accounts receivable, reflected net of any contractual arrangements, as of September 30 are as follows:

	2018	2017
Commercial payors, patients, and other	\$ 298,452	\$ 279,333

Less total allowance	<u>117,380</u>	<u>96,262</u>
	<u>\$ 319,592</u>	<u>\$ 315,335</u>

The allowance for estimated uncollectible accounts is determined by analyzing both historical information (write-offs by payor classification), as well as current economic conditions.

Depreciation expense was \$146,218 and \$138,637 for the years ended September 30, 2018 and 2017, respectively.

6. Assets Whose Use is Limited

Assets whose use is limited that will be used for obligations classified as current liabilities and the current portion of pledges receivable are reported in current assets. Investments in equity securities with readily determinable fair values and all investments in debt securities are measured at fair value, based on quoted market prices of identical or similar assets. The majority of the Health System's investments are managed by independent investment managers. The following table sets forth the composition of assets whose use is limited as of September 30:

The overall investment strategy and policy has been developed based on the need to satisfy the long-term liabilities of the Plans. Risk management is accomplished through diversification across asset classes, multiple investment manager portfolios, and both general and portfolio-specific investment guidelines. The asset allocation guidelines for the Plans are as follows:

	Target SLRMC	Target SLMVRMC
Investments:		
Large-cap funds	20 %	20 %
Mid-cap funds	10	10
Small-cap funds	10	10
Non-U.S. funds	20	20
Fixed income	29	39
Other	11	1

Managers are expected to generate a total return consistent with their philosophy and outperform both their respective peer group medians and an appropriate benchmark, net of expenses, over a one-, three-, and five-year period. The investment guidelines contain categorical restrictions such as no commodities, short-sales and margin purchases; and asset class restrictions that address such things as single security or sector concentration, capitalization limits and minimum quality standards.

Expected long-term returns on the Plans' assets are estimated by asset classes, and are generally based on historical returns, volatilities and risk premiums. Based upon the Plans' asset allocation, composite return percentiles are developed upon which the Plans' expected long-term return is determined. As of September 30, 2018, the amounts and percentages of the fair value of Plans' assets are as follows:

	<u>SLRMC</u>		<u>SLMVRMC</u>	
Domestic equity	\$ 52,742	38 %	\$ 20,062	43 %
International equity	33,217	24	8,885	19

Total	<u>\$ 139,345</u>	<u>100 %</u>	<u>\$ 46,349</u>	<u>100 %</u>

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid from the Plans:

	<u>SLRMC</u>	<u>SLMVRMC</u>	<u>Total</u>
2019	\$ 13,030	\$ 2,867	\$ 15,897

Assumptions used in determining the actuarial present value of projected benefit obligation of the Plans were as follows:

SLRMC	2018	2017
Weighted average discount rate	4.34 %	3.86 %
Rate of increase in future compensation levels	2.50–4.00	2.50–4.00
SLMVRMC		
Weighted average discount rate	4.30 %	3.78 %

The principal cause of the change in the unfunded pension liability is an increase in the fair value of pension assets, employer contributions and overall market performance.

Supplemental Retirement Plan for Executives—The Supplemental Retirement Plan for Executives (SERP) is a non-qualified retirement plan for certain executives of the Health System. The following table sets forth the funded status, amounts recognized in the Health System’s consolidated financial statements, and other SERP financial information:

	2018	2017
Projected benefit obligation for service rendered to date	\$ 21,421	\$ 20,083
Plan assets—at fair value	<u>-</u>	<u>-</u>
Funded status	<u>\$ (21,421)</u>	<u>\$ (20,083)</u>
Employer paid benefits	\$ 891	\$ 891
Accrued pension liability (noncurrent)	20,193	19,237
Accrued pension liability (current)	1,228	846
Change in funded status	1,338	(2,227)
Accumulated benefit obligation	21,016	19,441

The following table presents the pension benefit costs:

	2018	2017
Service cost	\$ 809	\$ 846
Interest cost	648	648
Amortization of net loss	<u>431</u>	<u>1,089</u>
Net periodic pension cost	<u>\$ 1,888</u>	<u>\$ 2,583</u>

Service cost is recorded on the Consolidated Statement of Operations, within the line item employee compensation and benefits. The other components of net periodic benefit cost are recorded in the Statement of Changes in Net Assets, as other components of net periodic pension cost.

Due to its non-qualified status, the SERP is considered unfunded under the Employee Retirement Income Security Act, as disclosed above. The System has set aside funds in a Rabbi Trust for the purpose of funding the SERP. The Rabbi Trust plan asset balance at September 30, 2018 and 2017 was \$4,485 and \$4,177, respectively.

The measurement dates used to determine pension benefits is September 30. Expected contributions to the Plan for the year ending September 30, 2019, are expected to be approximately \$1,228. The projected benefit obligation increase was primarily driven by participant movement, plan experience and the passage of time, off-set slightly by an increase in the discount rate.

Amounts recognized in unrestricted net assets related to the SERP at September 30, consist of:

	2018	2017
Prior service cost	\$ (148)	\$ -
Net actuarial loss	(3,916)	(3,723)

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid from the SERP:

	Benefit Payments
2019	\$ 1,228
2020	1,335
2021	1,327
2022	1,430
2023	1,458
2024–2028	<u>7,090</u>
	<u>\$ 13,868</u>

Assumptions used in determining the actuarial present value of net periodic benefit cost were as follows:

	2018	2017
Spot discount rates	3.29–3.87 %	2.97–3.76 %
Rate of increase in future compensation levels	4.00	4.00

Assumptions used in determining the actuarial present value of projected benefit obligation were as follows:

	2018	2017
Weighted average discount rate	4.31 %	3.78 %
Rate of increase in future compensation levels	4.00	4.00

Defined Contribution Plan—The Health System sponsors two defined contribution plans (the “contribution plans”) that cover substantially all of its employees. The Health System’s contributions to these contribution plans are at the discretion of the Health System’s Board of Directors. Amounts contributed are allocated to participants based on individual compensation amounts, years of service, and the participant’s level of participation in tax deferred annuity programs. During 2018 and 2017, contributions to these plans were \$36,542 and \$27,286, respectively.

11. Fair Value of Financial Instruments

The following disclosure of the estimated fair value of financial instruments is made in accordance with the requirements of ASC 825, *Financial Instruments*. The Health System accounts for certain assets and liabilities at fair value or on a basis that is approximate to fair value. The estimated fair value amounts have been determined by the Health System using available market information and appropriate valuation methodologies. However, considerable judgment is required in interpreting market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that the Health System could realize in a current market exchange.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value should be based on the assumptions that the market participants would use, including a consideration of nonperformance risk.

The Health System assesses the inputs used to measure fair value using a three-level hierarchy based on the extent to which inputs used in measuring fair value are observable in the market. The fair value hierarchy is as follows:

Level 1—Quoted (unadjusted) prices for identical assets or liabilities in active markets that the Health System has the ability to access.

Level 2—Other observable inputs, either directly or indirectly, including: Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified or contractual term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3—Unobservable inputs for the asset or liability. The determination to measure the asset or liability as a level 3 depends on the significance of the input to the fair value measurement.

The asset or liabilities fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. In instances where the inputs used to measure fair value fall into different levels of the hierarchy, the fair value measurement has been determined based on the lowest-level input that is significant to the fair value measurement in its entirety. The Health System's assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset. Valuation techniques used maximize the use of observable inputs and minimize the use of unobservable inputs. The Health System's policy is to recognize transfers between all levels as of the beginning of the reporting period. There were no significant transfers to or from Level 1 or Level 2 during the years ended September 30, 2018 and 2017.

Following is a description of the valuation methodologies used for the Health System's assets or liabilities measured at fair value.

Cash and Cash Equivalents—The carrying amounts reported in the balance sheet approximate their fair value.

Accounts Receivables, Accounts Payable, Accrued Liabilities, and Estimated Payable to Medicare and Medicaid Programs—The carrying amounts reported in the balance sheet approximate their fair value.

Assets Whose Use is Limited—These assets consist primarily of cash and cash equivalents, mutual funds, debt and equity securities, and pledges receivable. For cash and cash equivalents, pledges receivable and interest receivable, the carrying amount reported in the balance sheet approximates fair value.

For mutual funds the fair value is based on the value of the daily closing price as reported by the fund. Mutual funds held by the System are open-end mutual funds that are registered with the Securities and Exchange Commission. The mutual funds held by the System include funds that are traded on both active and inactive markets.

For equities (common stock), the fair value is based on the value of the closing price reported on the active market on which the individual securities are traded.

For government obligations, the fair value is measured using pricing models maximizing the use of observable inputs for similar securities.

For commercial paper, the fair value is based on amortized cost with observable inputs, including security cost, maturity, and credit rating.

For debt securities, the fair value is measured using quoted market prices and/or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flows, and other pricing models. These models are primarily industry standard models that consider various assumptions, including time value and yield curve as well as other relevant economic measures.

The following tables set forth by level within the fair value hierarchy a summary of the Health System's investments measured at fair value on a recurring basis as of September 30:

Total assets				<u>\$ 608,197</u>

Fair Value of Pension Plan Assets—In addition to the types of assets listed above as held by the Health System, the pension plans also hold assets within limited partnerships, limited liability companies, and common collective trusts.

Mutual funds are valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-ended mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price.

Government obligations are valued at pricing models maximizing the use of observable inputs for similar securities.

Limited partnerships and limited liability companies are valued at fair value based on the audited financial statements of the partnerships and the percentage ownership in the partnership. This method is an accepted practical expedient that is considered equivalent to NAV. The assets held were further considered for level of inputs used. When quoted prices are not available for identical or similar assets, real estate assets are valued under a discounted cash flow or lender survey approach that maximizes observable inputs, but includes adjustments for certain risks that may not be observable, such as such as cap & discount rates, maturities and loan to value ratios.

Common collective trusts are valued at the NAV of units of a bank collective trust. The NAV, as provided by the trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV. Were the Plan to initiate a full redemption of the collective trust, the investment advisor reserves the right to temporarily delay withdrawal from the trust in order to ensure that securities liquidations will be carried out in an orderly business manner.

The following table sets forth by level, based on the hierarchy requirements for fair value guidance outlined previously, a summary of the assets of the Health System's Plans measured at fair value on a recurring basis as of September 30:

The Health System's use of Level 3 unobservable inputs account for 4.04% and 4.42%, respectively, of the total fair value of Pension Assets as of September 30, 2018 and 2017. The following table summarizes the changes in Level 3 assets measured at fair value as of September 30:

Beginning balance—September 30, 2016	\$ 7,537
Allocation of net capital gain	43
Miscellaneous fees	(86)
Interest received	292
Change in net unrealized gains	<u>229</u>
Ending balance—September 30, 2017	8,015
Sales	(927)
Allocation of net capital gain	(4)
Miscellaneous fees	(63)
Interest received	220
Change in net unrealized gains	<u>126</u>
Ending balance—September 30, 2018	<u>\$ 7,367</u>

The unrealized gains and losses on investment accounts at September 30, 2018 were determined to be temporary in nature as the change in market value for these assets was the result of fluctuating interest rates and market activity rather than the deterioration of the credit worthiness of the issuers. In the event that the Health System disposes of these securities before maturity, it is expected that the realized gains or losses, if any, will be immaterial both quantitatively and qualitatively to the statement of operations and financial position as of the Health System's fiscal year end.

The following tables show the Health System's investments' fair values and gross unrealized losses for individual securities that have been in a continuous loss position for 12 months or less as of September 30, 2018 and those that have been in a loss position for 12 months or more as of September 30, 2018. These investments are interest-yielding debt securities of varying maturities. The Health System has determined that the unrealized loss position for these securities is primarily due to market volatility. Generally, in a rising interest rate environment, the estimated fair value of fixed income securities would be expected to decrease; conversely, in a decreasing interest rate environment, the estimated fair value of fixed income securities would be expected to increase. These securities may also be negatively impacted by illiquidity in the market.

	In a Continuous Loss Position for Less than 12 Months		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions
Corporate bonds, notes, mortgages and asset-backed securities	\$ 128,505	\$ (1,356)	344
Mutual funds	797	(35)	7
Government & agency securities	<u>82,226</u>	<u>(723)</u>	<u>128</u>
Total	<u>\$ 211,528</u>	<u>\$ (2,114)</u>	<u>479</u>

	In a Continuous Loss Position for more than 12 Months		
	Estimated Fair Value	Unrealized Losses	Total Number of Positions
Corporate bonds, notes, mortgages and asset-backed securities	\$ 66,839	\$ (1,143)	171
Mutual funds	8,772	(264)	23
Government & agency securities	<u>36,037</u>	<u>(1,060)</u>	<u>65</u>
Total	<u>\$ 111,648</u>	<u>\$ (2,467)</u>	<u>259</u>

Fair Value of Debt—The interest rate on the Health System's Variable Rate Revenue Bonds is reset daily to reflect current market rates. Consequently, the carrying value approximates fair value. The carrying amount reported in the balance sheet for capital leased assets approximates its fair value.

The estimated fair value of the Fixed Rate Bonds as of September 30, 2018 and 2017 was \$586,467 and \$556,810, respectively, and are based on Level 2 inputs within the fair value hierarchy. The fair value was estimated by discounting the future cash flows using rates currently available for debt of similar terms and maturity.

The estimated fair value of the notes payable as of September 30, 2018 and 2017, was \$25,252 and \$43,301, respectively. The fair value is based on Level 2 inputs within the fair value hierarchy and was estimated by discounting the future cash flows using rates currently available for debt of similar terms and maturity.

The fair value estimates presented herein are based on pertinent information available to management as of September 30, 2018. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date, and current estimates of fair value may differ significantly from the amounts presented herein.

12. Commitments and Contingencies

The Health System leases office space under operating leases, some of which contain renewal options. Rental expense on the operating leases during 2018 and 2017 were \$20,387 and \$16,867, respectively. The Health System also leases out space in medical office buildings under non-cancelable operating leases. Rental income on these leases during 2018 and 2017 were \$5,557 and \$2,753, respectively.

As of September 30, 2018, future minimum rental income and payments on operating leases are as follows:

Years Ending September 30	Minimum Rental Revenue	Minimum Rental Payments
2019	\$ 7,649	\$ 19,243
2020	5,117	16,042
2021	4,300	12,957
2022	1,295	11,522
2023	404	10,263
Thereafter	<u>445</u>	<u>61,027</u>
	<u>\$ 19,210</u>	<u>\$ 131,054</u>

Of the \$131,054 total future minimum rental payments, \$91,063 represents payments to be made to Broadway Park Holdings, LLC., an entity of which the Health System holds a 49.5% investment interest. As of September 30, 2018 and 2017, the Health System had commitments on construction contracts and equipment purchases totaling \$36,621 and \$25,775, respectively.

The Health System maintains professional liability coverage through a “claims made” insurance policy. The policy provides coverage for claims filed within the period of the policy term. The current policy period ends September 30, 2018, and includes provisions for purchase of tail coverage in the event a new carrier is selected. The Health System also maintains reserves based on actuarial estimates provided by an independent third party for the portion of its professional liability risks, including incurred but not reported claims, for which it does not have insurance coverage. Reserves for losses and related expenses are estimated using expected loss reporting patterns and are discounted to their present value using a discount rate of 4.0%. There can be no assurance that the ultimate liability will not exceed such estimates. Adjustments to the estimated reserves are included in results of operations in the periods when such amounts are determined. As of September 30, 2018 and 2017, the Health System had professional liability recorded in accounts payable and accrued liabilities in the amounts of \$19,360 and \$11,541, respectively.

In connection with the divestiture of the medical practice described in Note 2, on December 10, 2015, the Idaho Federal District Court entered an order setting out the process to divest the

practice from the Health System and appointing a Monitor and a Trustee to oversee the process. A transaction divesting the medical practice closed on May 1, 2017. As of September 30, 2018, all judgements, fees and insurance settlements relating to this matter have been monetarily resolved.

The Health System is routinely involved in other litigation matters and regulatory investigations arising in the normal course of business. After consultation with legal counsel, management estimates that these matters will be resolved without material effect on the Health System's future financial position, results of operations, or cash flows.

13. Functional Expenses

The Health System provides medical and healthcare services to residents within its geographic location. Expenses from continuing operations related to providing these services for the years ended September 30 are allocated as follows:

	2018	2017
Professional, nursing, and other patient care services	\$ 2,205,506	\$ 2,036,675
Fiscal and administrative support services	<u>377,031</u>	<u>311,652</u>
	<u>\$ 2,582,537</u>	<u>\$ 2,348,327</u>

14. Goodwill and Other Intangibles

The Health System considered various events and circumstances when it evaluated whether it's reporting unit fair values were less than their carrying value. Based on the Health System's assessment of relevant events and circumstances, the Health System has concluded that there was no impairment of goodwill for the fiscal years ended September 30, 2018 and 2017.

Other intangible assets of the Health System include covenants not to compete related to the acquisition of medical practices and are amortized over their useful lives, which typically range from five to seven years.

Other intangible assets as of September 30 consist of:

	2018	2017
Covenants not to compete	\$ 46,849	\$ 46,849
Less accumulated amortization	<u>(46,849)</u>	<u>(46,776)</u>
Total other intangible assets	<u>\$ -</u>	<u>\$ 73</u>

The Health System recorded amortization expense of \$73 and \$1,931 for the years ending September 30, 2018 and 2017, respectively.

15. Subsequent Events

The Health System has evaluated subsequent events through December 14, 2018. This is the date the financial statements were available to be issued.

Implementation Plan Overview

St. Luke's will continue to collaborate with the people, leaders, and organizations in our community to carry out an implementation plan designed to address many of the most pressing community health needs identified in this assessment. Utilizing effective, evidence-based programs and policies, we will work together to improve community health outcomes and well-being toward the goal of attaining the healthiest community possible.

Future Community Health Needs Assessments

We intend to reassess the health needs of our community on an ongoing basis and conduct a full community health needs assessment once every three years. St. Luke's next Community Health Needs Assessment is scheduled to be completed in 2019.

History of Community Health Needs Assessments and Impact of Actions Taken

In our 2013 CHNA, St. Luke's Wood River identified 4 groups of significant health needs facing individuals and families in our community. Each of these groups is shown below, along with a description of the impact we have had on addressing these needs over the past three years.

Group 1: Behavioral Health and Substance Abuse Services and Programs

Programs for mental illness, availability of mental health service providers, and substance abuse were identified as high priority community health needs. Suicide prevention was ranked above the median. We grouped the programs designed to serve these needs together because we believe they reinforce one another.

From on-going free mental health screenings to a new behavioral health clinic, St. Luke's Wood River is helping to provide much-needed access to care for people with mental and behavioral health needs in our community.

Over the past three years, St. Luke's Wood River Family Medicine has continued to screen its patients for depression, because early detection can result in decrease of acuity, patients can receive more appropriate and effective treatment, and ED visits and hospitalizations can be decreased. In addition, our primary care physicians are taking a more active role in the treatment of mental health conditions. Six of our primary care physicians attended a REACH (Resources for Advancing Children's Health) course, which is a three-day, intensive, integrative training for primary care providers that covers assessment, diagnosis, treatment and medication management for a variety of mental health conditions, including depression, anxiety, aggression, bi-polar and psychosis.

With the support of our mental health professional team at St. Luke's Clinic – Mental Health Services we trained all patient access and nursing staff at all our clinics (primary care, neurology, rehab, ob/gyn, orthopaedics, dermatology) on a suicide protocol to assist them in properly responding to suicidal patients. Additionally, our mental health team regularly provides community education about mental health and suicide prevention in a variety of settings – school, community, hospital.

St. Luke's Clinic – Mental Health Services

In October 2013, St. Luke's Wood River opened St. Luke's Clinic – Mental Health Services, providing a full spectrum of mental health services with a clinical team consisting of a full-time psychiatrist, 2 mental health therapists, and a nurse. We provide consultation, co-management, diagnostic, and multidisciplinary mental health services in close coordination with our primary care physicians and community-based therapists. Since its inception we have served over 1,000 patients in the clinic.

Counseling Scholarship Fund

During the past 3 years we have continued to offer our Counseling Scholarship Fund, a program that provides funding and facilitates access to community-based mental health counseling for uninsured and underinsured individuals and families. This scholarship fund helps offset the high costs of community-based mental health counseling for people in need. These critical counseling sessions help address a wide range of mental health issues including suicide, parenting, anxiety, and depression. In 2014 and 2015 we served 143 people with this fund.

Mental Health Services Scholarship Fund

Additionally, in 2016 we began our Mental Health Services Scholarship Fund, a program that provides funding for patients seeking psychiatric or counseling services at St. Luke's Clinic – Mental Health Services who are uninsured and underinsured. We have patients who report reducing the number of visits to our therapists or psychiatrist for lack of ability to afford their services and some who have stopped coming for care for this reason. We hope to reduce the number of patients who chose to stop receiving services and help others maintain the recommended care plan from their provider by providing them the funds to do so. Since the scholarship began we have assisted 8 patients in receiving care through the clinic. While the patients mental health services are being covered, staff start the process of connecting the patient with St. Luke's Patient Financial Services to create a more long-term, sustainable funding source for the patient. This may include Medicaid, a St. Luke's Financial Care Plan, or Social Security Disability.

Car Seat Safety Checks

Certified child passenger safety technicians install car seats before newborns are discharged from the medical center, fit older children to their seats, teach proper installation, and check for recalls. We offer monthly scheduled car seat checks or people

can call for individual checks. We expect that properly fitting children to car seats prevents unnecessary injuries from car accidents. We do not allow an infant to leave the medical center after birth without a properly installed car seat. We properly fitted over 350 car seats from 2013 – 2015.

Group 2: Weight Management/Fitness Programs Ranked as High Priority

Adult and teen weight management programs were ranked as high priority health needs. According to the CDC, the key to achieving and maintaining a healthy weight is about a lifestyle that includes healthy eating, regular physical activity, and balancing the number of calories you consume with the number of calories your body uses. Therefore, our weight management programs include physical activity and nutrition components. There is great diversity in patient needs when it comes to weight management. No single program can address the entire range of patient medical needs, schedules, or preferences. Therefore, St. Luke's has chosen to offer a number of weight loss programs designed to meet a wide variety patient circumstances.

YEAH!

Over the last three years, St. Luke's Wood River has engaged hundreds of individuals in weight loss, nutrition, and fitness programs. These programs ranged from body mass index (BMI) screenings in clinics and at health fairs to YEAH!, a wellness program that helps participating children and their families to create healthier lifestyles. Since 2013 we have seen positive changes in multiple aspects of our participants health, including blood pressure, weigh, waist circumference, and quality of life. For instance, 55% of children who participated in 2014 improved their blood pressure, weight status and waist circumference and 60% of parents saw an improvement in their children's quality of life in Spring 2015. In 2016 Wood River YEAH added the component of a "Cooking Demonstration" to the program.

HealthyU

HealthyU is a program provided free of charge to our employees and has proved meaningful when it comes to motivating people to lose weight and maintain their weight loss: from 2014 to 2015, health measures for both the areas of obesity and waist circumference improved by 14% and 12% respectfully among St. Luke's Wood River employees.

Group 3: Barriers to Access Programs Ranked as High Priority

The programs in this section address the needs that center around barriers to access: Affordable care; affordable health insurance; more providers accept public health insurance; and children and family services for low income individuals.

Insurance/Payer Inclusion

All St. Luke's providers and facilities accept all insurances, including Medicare and Medicaid. It is the patient's responsibility to provide the hospital with accurate information regarding health insurance, address, and applicable financial resources to determine whether the patient is eligible for coverage through existing private insurance or through available public assistance programs.

Financial Screening and Assistance

St. Luke's works with patients at financial risk to assist them in making financial arrangements through payment plans or by screening patients for enrollment into available government or privately sponsored programs that they are eligible for. These programs include, but are not limited to, various Medicaid programs, COBRA and County Assistance. St. Luke's does not only screen for these programs, they help the patient navigate through the application process until a determination is made.

In 2014 an additional Financial Navigator was added to ensure support for the uninsured and underinsurance patients at the WR clinics. We also trained 2 staff at the Center for Community Health as In-Person Assisters and enrolled over 300 individuals into an insurance plan that did not previously have insurance as a participant in the Insurance Exchange open-enrollment period. In 2015 and 2016 we continued to enroll individuals who qualify for Exchange plans.

Financial Care and Charity

St. Luke's is committed to caring for the health and well-being of all patients, regardless of their ability to pay for all or part of the care provided. Therefore, St. Luke's offers financial care to patients who are uninsured and underinsured to help cover the cost of non-elective treatment. Charity Care services are provided on a sliding scale adjustment based on income (based on the Federal Poverty Guideline), expenses and eligibility for private or public health coverage. We estimate the impact from charity care and bad debt to be over \$8 million from 2013 through 2016.

Information and Referral Services through the St. Luke's Center for Community Health

The St. Luke's Center for Community Health (CCH) connects our community to local health and mental health providers, social service agencies, government agencies, emergency services, and other nonprofit organizations. The highly trained, bilingual staff meets one-on-one with those who are seeking information and referral services to fully understand all their health and social needs. We work closely with St. Luke's providers to assist their patients in getting connected to services they need to care for themselves and their families and we help them navigate our complex medical system and government services. From 2013 - 2015 we had almost 14,000 client interactions with this service.

Compassionate Care Program

St. Luke's recognizes that health crises and hospitalizations may create financial hardships for patients and their families. In the late fall of 2016, we began our Compassionate Care Program (CCP) in partnership with the St. Luke's Wood River Foundation, providing for emergent needs of patients and their immediate families, excluding hospital and professional fees normally assisted by Patient Financial Services. The CCP resources include, but are not limited to, assistance with food, lodging, transportation, medications, medical supplies, dental services, and other items deemed necessary for improving a patient's health status. Assistance from the CCP is limited to the immediate family members and patients who have been admitted to, or have received services from, St. Luke's, are actively engaged in their health care, and meet financial eligibility requirements.

Since its inception in late October 2016, we have assisted 31 people, utilizing approximately \$8,500 of the fund.

Ketchum/Sun Valley Ministerial Fund

Religious organizations in the community make donations to the Ketchum/Sun Valley Ministerial fund at a level each organization determines for itself. These funds are then distributed to the community by the St. Luke's Center for Community Health and our partner organization, The Advocates for Survivors of Domestic Violence and Sexual Assault. Funds are used primarily for community members needing emergency financial assistance for needs that impact their quality of life, such as utilities, rent, transportation, prescription assistance, and day care. This fund is limited to \$50 per person per year. Since 2013 St. Luke's serves an average of 35-50 people each year, spending a little under \$2,000 of the fund.

Group 4: Additional Health Screening and Education Programs Ranked Above the Median

We recognize the importance of affordable screenings for early detection and preventable health issues especially serving those in our community who are low-income and under- or not insured.

Heart of the Matter Health Screening

This screening has been offered regularly in our community since the mid-90s, providing an opportunity for the community to access a reduced cost glucose, triglycerides, cholesterol blood test with the addition of an A1c test for those diagnosed with diabetes. Additionally available at the screening events were blood pressure checks and robust health education information about cardiac health, nutrition, exercise, stress management, and other services offered by St. Luke's Wood River. If our lab receives any critical value results, our professional staff calls the participant directly and connects him/her with a primary care physician. In the years 2013-2015 we served over 2,600 people.

For fiscal year 2016 we changed the format of our screening program from a 2-day only screening to a 5 days a week, all year long opportunity to be screened in our primary care clinics, allowing for more access for the community. Lab results can now be sent directly to a participants MyChart account.

Brown Bag Health Talks

Through the Center for Community Health we offer free one-hour health education talks to the community. These talks are held weekly using St. Luke's Wood River physicians, licensed health care professionals, and experts from some of our partner organizations. We provide this service to help educate our community on a multitude of health topics, especially those that address critical unmet health needs as indicated by our CHNA. It also gives our community an opportunity to engage with our clinical professionals, developing relationships outside of the clinic environment. Since 2013 over 1800 people have attended these educational talks.

Discover Health Fair

Held annually, St. Luke's Wood River health fair promotes healthy lifestyles, strong exercise and eating habits, and healthcare education, as well as providing access to discounted laboratory tests. Each year we engage hundreds of community members of all ages with fitness and cooking demonstrations, more than 60 informational booths from community partner organizations, and health care screenings.

Breast Screening for the Uninsured and Underinsured Women Project

The goal of the St. Luke's Wood River Breast Screening for the Uninsured and Underinsured Women Project is to fund screening and/or diagnostic mammograms and/or breast ultrasound for women 25 years of age or older, thus removing cost as a barrier for women accessing breast health services, identifying cancer at an earlier stage when it is easier to treat, and ultimately increasing the survival rate of women receiving support from this project. This project is funded through the Idaho Affiliate, Susan G. Komen for the Cure.

Recognizing the direct connection between access to mammography screening and decreased incidence of cancer and death, St. Luke's Wood River has made it a priority to provide the most advanced breast imaging technology available for all women in our rural service area.

This program is vital in our effort to encourage all women in our community to access mammography services. Given the continuing uncertain economic climate, we anticipate that preventative healthcare services, such as mammograms, are one of the things women will delay to pay for other household expenses. Now, more than ever, women in our community need this assistance. In 2014 and 2015 more than 200 women were served through this funding program, including diagnostic mammograms, screening mammograms, and ultrasound exams.
